ABOUT ME

AI Developer with a strong orientation toward applied AI, medical imaging, and intelligent systems. Experienced in developing end-to-end software solutions using deep learning, machine learning, and biomedical signal processing.

EDUCATION

B.Sc. in Biomedical Engineering
Cairo University (2021 - Present) - GPA: **3.62**

TECHNICAL SKILLS

- **AI & Deep Learning**: Neural networks, CNNs classification, model evaluation
- **Computer Vision**: Image segmentation, feature extraction, PCA, edge detection
- **ML Tools**: Scikit-learn, SHAP, TensorFlow, Keras, OpenCV, Pandas, Seaborn, SciPy
- **Programming**: Python, C++, C, Java
- **Data Handling**: Preprocessing, feature engineering, statistical evaluation
- **Digital Signal** Processing: Biomedical signal filtering, ECG processing
- **Embedded Systems**: MCU interfacing, STM32 driver development
- **Web Development**: HTML, CSS, JavaScript
- **Bioinformatics**: Microbiome profiling, genomic data processing

RESEARCH INTERESTS

- Deep learning for biomedical imaging and signal interpretation
- Explainable ML - clinical transparency & trust
- AI-based medical diagnostics and DSS
- Cross-Domain Apps of AI in Computer Vision, Forecasting & Recommender Systems

CERTFICATES

- Frontend Web Development - HTML, CSS, JS
  Click Here to see all the Certificates

PROJECTS

- **Explainable Breast Cancer Classifier**
  ML model for tumor detection with SHAP-based interpretability & visualizations. [GitHub Link]
- **Real-Time ECG Arrhythmia Detection System**
  Deep Learning powered arrhythmia detection with smart alerts and noise-resistant display. [GitHub Link]
- **Tabular ML Music Genre Classifier**
  XGBoost-based classifier using extracted audio features to achieve 92.64% accuracy. [GitHub Link]
- **Autonomous Traffic Sign Recognition**
  Custom CNN achieving 96.23% accuracy for classifying 43 types of traffic signs for ADAS. [GitHub Link]
- **Healthcare Patient Segmentation Tool**
  K-Means clustering with PCA to segment patients into risk groups for targeted healthcare interventions. [GitHub Link]
- **Retail Sales Forecasting Model**
  Random Forest regression model achieving 97.69% R^2 score for weekly Walmart sales prediction. [GitHub Link]
- **Loan Approval Prediction System**
  Logistic Regression vs SVM for predicting loan approvals, with achieving 93.68% accuracy. [GitHub Link]
- **Oral Cancer Prediction**
  RF classifier trained on microbiome data to achieve 92.89% accuracy, SHAP clinical insights. [GitHub Link]
- **Advanced CV & Image Processing Toolkit**
  Detection, segmentation and matching Toolkit. [GitHub Link]
- **Beamforming Simulator Application**
  Simulation for telecom and medical use [GitHub Link]

INTERNSHIPS

- **Optoscient BME Intern | *2025 (Upcoming)***
  Internship on digital pathology systems and technical support.
- **Elevvo AI Internship | *2025 (04 Weeks)***
  Project-based Intern ML, DL, and CV to real-world problems
